DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to Computer Network Management, classified in class 709, subclass 223.
 - II. Claims 14-21 and 28-29, drawn to session/parameter setting, classified in class 709, subclass 228.
 - III. Claims 22-24 and 30, drawn to Network Resource Access Controlling, classified in class 709, subclass 229.
 - IV. Claims 25-27, drawn to Computer-to-Computer session/connection establishing, classified in class 709, subclass 227.
 - V. Claim 38, drawn to Computer network monitoring, classified in class 709, subclass 224.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions group I, group II, group III, group IV and group V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it distinctly relates Computer Network Management. The second subcombination has separate utility such as

session/connection parameters setting. The third subcombination has separate utility such as Network Resource Access Controlling, the fourth subcombination has separate utility such as computer to Computer-to-Computer session/connection establishing, the fifth subcombination has separate utility such as Computer network monitoring.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS ACTION IS SET TO EXPIRE THIRTY DAYS FROM THE MAILING OF THIS COMMUNICATION. FAILURE TO RESPOND WITHIN THE PERIOD FOR RESPONSE WILL CAUSE THE APPLICATION TO BECOME ABANDONED (35 USC § 133). EXTENSION OF TIME MAY BE OBTAINED UNDER PROVISION OF 37 CFR 1.136(A).
